## ■ KEY TO ICONS

# Feeling utterly at ease.

*Wellness is a well-rounded affair. As a full-service supplier for every part of the SPA – from the sauna to infrared lighting and steam baths – we supply compelling solutions that satisfy individual expectations. We rely on in-house development and production to guarantee the highest standards of quality.*

*We don't just use any old wood for the interior fittings in our cabins. After all, the wood must be able to withstand extreme fluctuations in temperature. The quality of Nordic pine wood is – due to the slow growth of the trees – particularly good, however high-quality woods such as aspen, hemlock and lime wood are also outstandingly suited for this.*

*What distinguishes us is the close relationship and contact we maintain with our customers. This results in pioneering innovations and continual product improvements that are showcased in this catalogue as well. A functional and well-thought-out product range guarantees easy installation and user-friendly operation. This is true of both our standard range of cabins and for our custom-made solutions. You don't need to worry about the technology or how to implement it. That's the service we offer.*

*In particular, the modular design of our made-to-measure steam baths has proved its worth over the last few years. The sentiotec Spa Modules allow your individual plans to be realised straightforwardly and pragmatically. Place your trust in one of the industry's market leaders in this area as well.*

A woman with blonde hair is lying down in a sauna, wrapped in a white towel. She has her eyes closed and her right arm is raised behind her head. The sauna's interior is made of light-colored wooden slats. The text "SAUNA CABINS" is centered over the image.

The image shows the interior of a modern infrared sauna. The walls are constructed from horizontal wooden planks. In the center, there are four vertical infrared heaters, each emitting a bright orange-red glow. These heaters are arranged in two columns of two. The sauna features several horizontal wooden benches for seating. The floor is also made of wood. The overall atmosphere is warm and relaxing. The brand name 'VENUSVITAL' is prominently displayed in the center of the image.

VENUSVITAL

# Individual custom sauna

IR cabins

■ Style IR cabin made to measure

■ Style IR cabin made to measure

■ Carat IR cabin made to measure

A large, clear, faceted crystal point, possibly a quartz or selenite, stands vertically on a dark, circular, textured base. The crystal is illuminated from within, casting a warm, golden glow. The background is a dark, textured wall, and the floor is a smooth, light-colored surface. The overall atmosphere is serene and spiritual.

# Custom-made Spa Modules

*Steam baths made to measure*

## sentiotec Spa Modules for your wellness area.

The Spa Modules allow you to have your dream steam bath put together by us, from the walls to the interior fittings. The compact design allows them to be customised for small spaces and makes the modules quick and easy to install. Showers and pools won't be a problem for the flexible modules made of extruded polystyrene (XPS) either.

## sentiotec Spa Modules are

- easy and fast to install
- adaptable
- light in weight, yet heavy duty
- particularly water repellent
- absorb heat easily
- Made of extruded polystyrene (XPS)

The sentiotec Spa Modules encompass wall, roof, seat and any other parts as ready-to-install components. The installed module then needs to be primed so it is waterproof, and be individually tiled. (Tiles and primer are not included with the delivery.) We leave our customers room for creativity. They are suitable for use in the home bathroom, in public spas, in fitness studios, hotels, and so on.

## We can customise the following products for you:

- Steam baths
- Shower areas
- Cooling room, ice room
- Furniture (lounges, benches, water trays etc.)

## We can also offer you the following accessories:

- Harvia HGX and HGP steam generators and accessories
- Doors with an aluminium frame
- Starry sky
- Steam fountain

# Custom-made Spa Modules

*Steam baths made to measure*

## sentiotec Spa Modules for your wellness area.

Showers are part of every wellness area. The sentiotec Spa Module showers make it easy and straightforward to plan and install your showers. Snail shaped showers or round ones, with or without curves, our modules let you structure your wellness area individually, even at home. We currently offer 3 different models:

- "Round" shower - 2100 mm high
- "Snail" shower - 2100 mm high
- "Tulip" shower - 2500 mm high
- Customised models available

## sentiotec Spa Module benches aren't just comfortable but also stylish.

It doesn't matter how long and wide your steam bath is, we can adapt the size to your individual requirements. They are easy to tile to suit your requirements. Tiles are not included – please explore your creativity!

We currently offer four different benches:

- Basic Bench without backrest
- Basic bench
- Basic 1 bench
- Basic 2 bench
- Bench de luxe

# Custom-made Spa Modules

*Steam baths made to measure*

## Relax modules

Relax modules will tempt you to take a break. The lightweight modules can be placed wherever you like, and be tiled individually. (Tiles are not included – please explore your creativity!) We currently offer 3 different types of relax modules:

- “Relax”
- “Sleep”
- “Couch”
- All our relax modules are available with or without integrated electric heating.

## Door with aluminium frame

The new door with an aluminium frame is an excellent solution for steam baths. They were specifically developed for steam bath conditions. They create a uniform appearance throughout your wellness area. The glass door is made of 8 mm thick safety glass.

Our doors are designed so that no screw heads are visible, the door handle is made of aluminium and the glass is available in the following versions: bronze, smoky grey, clear and satin.

## Steam bath lighting

To set your steam bath in scene, we also offer you different types of steam bath lighting. Create a pleasant environment with light crystals from sentiotec.

We current offer you four different versions of the crystals:

- Polyhedron crystal
- Round crystal
- Diamond crystal, short
- Diamond crystal, long

# Icon explanation

The control unit can be expanded through an additional module (e.g. humidity module)

The control unit offers a timer function that can be used, for example, to program the pre-set time

Solid cabin: 40 mm block plank, planed on both sides, made of solid spruce, prefabricated to elements

Element cabin: Tongue and groove boards or panels inside and outside (thickness according to specifications), high-quality insulation in between for saunas

Polished glass doors: 6 or 8 mm thick single pane safety glass, including door seal, door hinges, door handle and door latch, hinged on left

Polished glass doors: 6 or 8 mm thick, including door seal, door hinges, door handle and door latch, hinged on right

IR red-light full-spectrum radiator

Dimmable red-light radiator

Control unit with music function

MP3 player with radio function

The control unit is suitable for coloured light mode

Heating time limit – the control unit shuts down automatically after this number of hours

Specifies the operating voltage for the sauna heater
